Personal Toolcodes

(Last updated 20/08/2024 by HB)

If you have personal tools you use at the ADC, you can request a toolcode to keep track of them. A toolcode is two colours of electrical (PVC) tape (you can get this from sundries), which you can attach to your tools to identify them as yours. If you find tools with tape on them, they likely belong to someone - the following list contains toolcodes in current use, so things can be returned to their owners. If you want a toolcode, find an empty one in the list you like and email technical@adctheatre.com to request it.

If you have previously had a toolcode and it does not display below, please contact the Technical Manager to have it reassigned to you, or to have a new toolcode allocated to you.
